## 5. LALU KLIK KELOLA DATABASE DAN IMPORT DARI PHPMYADMIN

The screenshot shows the 000webhost dashboard. At the top, there's a navigation bar with icons for 'Buat Website', 'Tetapkan web address', 'File manager', 'Kelola database', 'Kelola email', 'Learn to Code', and 'Pengaturan'. The 'Kelola database' section is active, showing a progress bar for 'Database yang Digunakan' at 1 of 2. Below this, there's a red button labeled 'TAMBAHKAN LEBIH BANYAK RESOURCE'. A message states: 'Membutuhkan lebih? Tingkatkan ukuran database & kuantitas hanya dengan upgrade ke PRO!'. The main content area is titled 'Kelola Database' and includes instructions on how to create and manage a MySQL database using phpMyAdmin. It also provides details about database limits (1 GB, 150 tables) and default settings (InnoDB engine, MariaDB 10.1). A table lists the database details:

Nama DB	DB User	DB Host	
id8269431_mydb	id8269431_root	localhost	Kelola

Below the table is a red button labeled 'Database Baru'.
