

Cara Instalasi F-SHARE

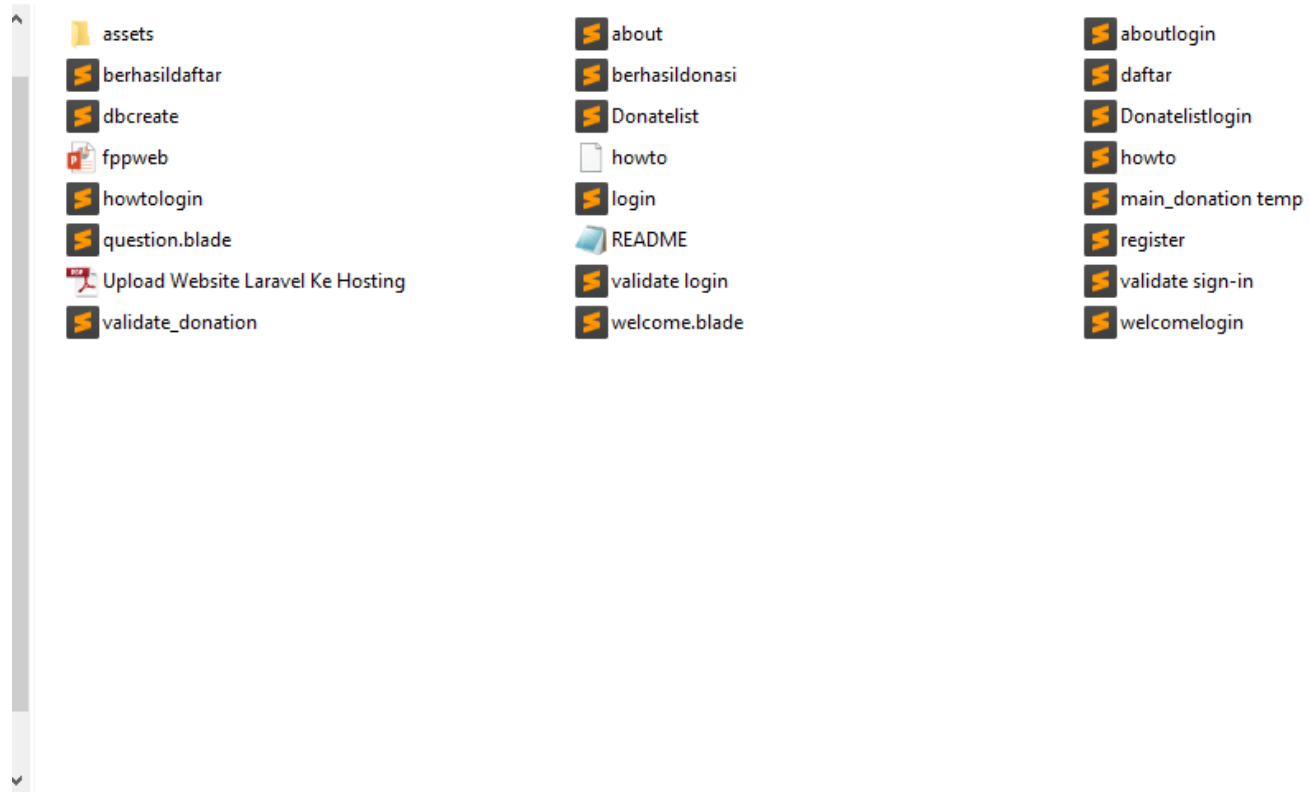

Anggota:

-Muhammad Naufal Refadi (05111740000097)

-David Laksana (05111740000045)

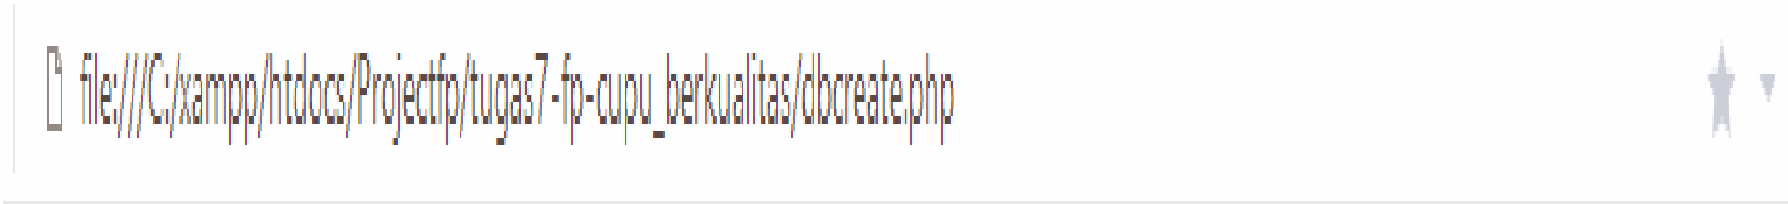

1. Git clone https://github.com/2018-PemrogramanWeb-B/tugas7-fp-cupu_berkualitas.git

2. Buka file Project

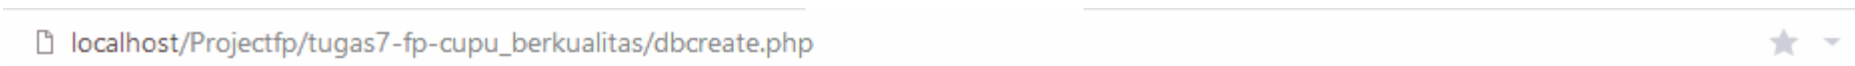

3. Drag dbcreate.php ke browser

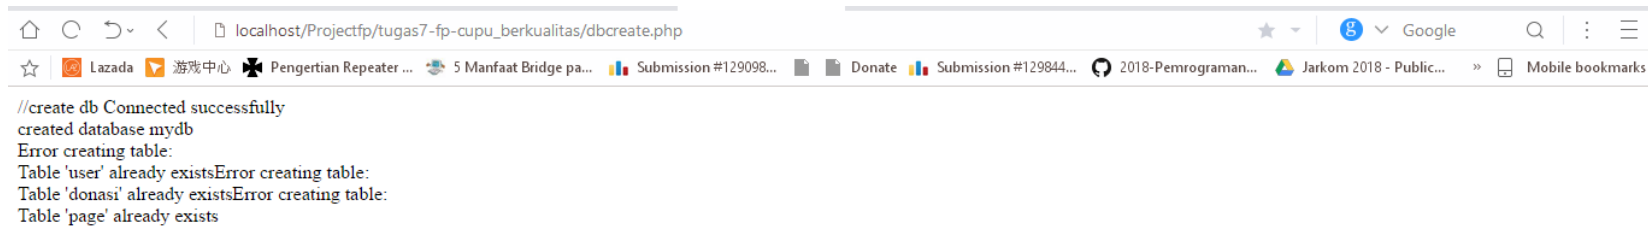

- ▶ Jika keluarnya seperti dibawah ini atau semacam seperti ini

- ▶ Editlah linknya seperti dibawah ini.

4. Setelah itu jalankan

The screenshot shows a web browser window with the address bar displaying `localhost/Projectfp/tugas7-fp-cupu_berkualitas/dbcreate.php`. The browser's address bar includes navigation icons (home, back, forward, refresh) and a search bar with the Google logo. Below the address bar, there is a bookmarks bar with several entries: Lazada, 游戏中心, Pengertian Repeater ..., 5 Manfaat Bridge pa..., Submission #129098..., Donate, Submission #129844..., 2018-Pemrograman..., Jarkom 2018 - Public..., and Mobile bookmarks. The main content area of the browser displays the output of a PHP script:

```
//create db Connected successfully
created database mydb
Error creating table:
Table 'user' already existsError creating table:
Table 'donasi' already existsError creating table:
Table 'page' already exists
```
